

ARUP DAS

Final-Year B. Tech Student — Computer Science & Engineering (AI/ML)

Kolkata, West Bengal, India | +91 7439399239 | dasarup0804@gmail.com

Portfolio: <https://arup-portfolio-seven.vercel.app/> | LinkedIn: [ARUP DAS](#) | GitHub: [arupdas0825](#)

PROFILE

Date of Birth: 08/11/2004
Nationality: Indian

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript / TypeScript
- SQL

Frontend

- React, Next.js
- Vite, Tailwind CSS

Backend & APIs

- Node.js (REST APIs)
- FastAPI (Python)

Cloud & Data

- Firebase (Auth, Firestore)
- MySQL

Applied AI

- Machine Learning fundamentals
- Local LLM integration (Ollama)
- Prompt engineering
- Data analysis

Tools

- Git / GitHub
- VS Code, MS Office

CERTIFICATIONS

AI Fluency: Framework & Foundations
Anthropic, 2026

Claude 101
Anthropic, 2026

LEADERSHIP & ACTIVITIES

Class Representative
B. Tech CSE (AIML), Brainware University,
2024–25

**Participant, “The Prompters” —
TEXIBITION 2K26**
Brainware University Tech Club, 2026

LANGUAGES

Bengali — Native (C2)

English

Listening B2 · Reading B2
Speaking B1/A2 · Writing B1
(IELTS preparation in progress)

Hindi

Listening B2 · Reading A2
Speaking B1/B2 · Writing A1

German

ABOUT

Third-year B. Tech student in Computer Science and Engineering (AI/ML specialization) at Brainware University, Kolkata, with a CGPA of 7.9/10.0. Builds complete, end-to-end applications spanning full-stack web engineering, cloud-backed architectures, and applied AI/LLM integration, demonstrated through several independently developed projects — from a quantitative scoring algorithm to a locally-run large language model integration. Seeking to pursue an M.Sc. in Computer Science / Data Science / Artificial Intelligence in Austria to build a deeper theoretical foundation in machine learning and contribute to applied AI research.

EDUCATION

B. Tech, Computer Science & Engineering (AI/ML) Aug 2024 – Present (June 2028)
Brainware University, Kolkata, India

CGPA: 7.9/10.0 (currently in 3rd year). Core coursework: Artificial Intelligence, Machine Learning Algorithms, Data Structures & Algorithms, Probability & Statistics for Data Analytics, Database Management Systems, Operating Systems, Computer Organization & Architecture, Discrete Mathematics, Object-Oriented Programming.

Higher Secondary Education (10+2, Science) Sept 2020 – June 2022
Uttar Dum Dum Vidyapith For Boys, Kolkata, India

Physics, Chemistry, Mathematics, Biology (Optional). Final grade: A+ (WBCHE).

Secondary Education Jan 2019 – June 2020
Uttar Dum Dum Vidyapith For Boys, Kolkata, India
Final grade: A (WBBSE, Madhyamik Pariksha).

KEY PROJECTS

EverBond Wealth — Couple-Focused Financial Planning Platform *Personal Project, 2026–Present*

- Designed and built a full-stack financial planning web app with three adaptive life-stage modes (Single, Committed Partner, Family Dynasty) that restructure the dashboard and calculation logic in real time.
- Engineered a financial calculation engine that replicates a multi-sheet Excel investment model, computing cascading budget allocations across needs, emergency funds, and a multi-asset investment split (equity, debt, commodities, crypto) with further sub-allocation by risk tier.
- Implemented Firebase Authentication and Firestore for real-time sync, plus a QR-code partner-connection system allowing two users to manage shared finances collaboratively.
- Built as an installable Progressive Web App (PWA) with offline support via a custom service worker.

Tech: React 19, Vite, Firebase (Auth, Firestore), Zustand, Recharts, Framer Motion

Live: <https://everbond-wealth.vercel.app>

DevTrack — Developer Intelligence Platform *Personal Project, 2026*

- Built a platform that converts a developer's public GitHub activity into a quantitative 0–100 “Developer Score” using a custom multi-factor weighted algorithm.
- Designed a technical-diversity metric using Shannon entropy to measure how evenly a developer's work is distributed across programming languages, combined with a log-scaled repository quality metric.

A1 (all skills)
(Currently enrolled in A1–A2 course)

INTERESTS

Photography — landscape and street photography, architectural composition and visual storytelling.

- Built a rules-based insight engine that translates the quantitative score into human-readable strengths, weaknesses, a suggested tech stack, and a staged learning roadmap.
- Integrated Firebase Authentication (GitHub OAuth) and Firestore persistence with the GitHub REST API v3 as the live data source, including a zero-config demo mode.

Tech: Next.js 16, React 19, TypeScript, Tailwind CSS, Firebase, GitHub REST API, Framer Motion, Recharts

Live: <https://dev-track-brown.vercel.app>

NeuralCode — Privacy-First AI Code Translator & Explainer *Personal Project, 2025*

- Built a developer tool that translates, explains, and documents code across 14 programming languages using a 100% local large language model (Code Llama via Ollama) — no cloud API calls, no source code leaves the user's machine.
- Designed a temperature-stratified prompt engineering framework: low-temperature deterministic prompts for translation, structured prompts for natural-language explanation (including a simplified “Explain Like I’m 10” mode), and zero-temperature prompts for language classification.
- Implemented four asynchronous API endpoints (translate, explain, comment, detect) with input validation, timeout handling, and descriptive error propagation.
- Authored an accompanying technical report documenting the system architecture, a formal problem definition for the code-translation task, and a review of transformer-based code models (Codex, CodeT5, Code Llama).

Tech: Next.js 14, TypeScript, Tailwind CSS, Ollama (local LLM inference), Prompt Engineering
